Scott Industrial Systems Completes Implementation of New Distribution Software

Farmington Hills, Michigan-December 15, 2008 Central Data Systems announces that Scott Industrial Systems (www.scottindustrialsystems.com) headquartered in Dayton, Ohio with warehouses in Ohio and Indiana, successfully completed their implementation of SX.enterprise, a distribution software solution developed by Infor Global Solutions and marketed, implemented and supported by Central Data Systems of Farmington Hills, MI.

Scott Industrial began operations in 1948 and is a full service fluid power distributorship servicing customers in six mid-western states. Scott Industrial represents over 50 major manufacturers of hydraulic, pneumatic, and electrical components selling into markets such as industrial, mobile and medical.

"Scott Industrial Systems has only had one software system since its inception as a Fluid Power Distributor 60 years ago. So when we decided it was time to replace it, we wanted one that would fulfill all our current needs and have the capacity and flexibility to serve our customers' changing needs for many years to come. After an exhaustive search and review, including numerous site visits, we selected SX.enterprise as the software, and Central Data Systems as our partner to work with during the implementation and throughout the years to come. We are confident we made the right choice for both. The professionalism and response from CDS has lived up to our expectations." Mark Bryan, President, Scott Industrial Systems

SX.enterprise is being used by hundreds of distributors nationwide to enhance customer service, optimize inventory levels, increase productivity and improve profitability. Advanced in both design and function, yet remarkably easy-to-use, SX.enterprise delivers unprecedented quality and functionality.

With a flexible, modular-based design, SX.enterprise can be tailored to meet the specific needs of nearly any distributor's business. Robust functionality and innovative features are integrated in a powerful software system designed to evolve with ever-changing advances in technology.

SX enterprise is the industry leading Enterprise Resource Planning (ERP) system for supply chain companies that automates critical supply-chain business processes. SX.enterprise helps distributors uncover hidden profit and new growth opportunities in their business through effective management of their assets and resources.

About CDS - Central Data Systems, a Distributor Edge company (www.centaldata.com), is an Infor Channel Partner of SX.enterprise. As a certified SX.enterprise solution center for 14 years, Central Data Systems supports more than 100 distributors in the Great Lakes region in a variety of verticals, including building materials, industrial, HVAC, electrical, janitorial, beauty,

oil and fluid power.

Central Data Systems, has serviced the wholesale distribution market since 1973, continuously licensing new technologies to keep ahead of its customers' changing needs. Central Data Systems located in Farmington Hills, Michigan is a Microsoft Gold Certified partner, as well as a full network and hardware infrastructure solution provider.
